Priority emphasis is being given to the procurement of top level executive and professional personnel for all components of CIA but especially OFC and OSO. At the present time there are five personnel representatives in various locations throughout the entire United States making the necessary contacts.

Inasmuch as these contacts are not seeking employment but rather are being asked to join our organization, it is requested that authority be granted for the payment of transportation and related expenses incident to a required trip to Washington for 50 selected applicants.
